Summary

Eager to start new challenges, self-motivated, and goal oriented. Full-stack developer with a background in engineering. Proficient in web development in an Agile team environment. Looking forward to developing more skills.

Technical Skills

BackEnd: Node, Express, MySQL, Sequelize, MongoDB, Mongoose, REST.

FrontEnd: JavaScript, HTML, CSS, React, Bootstrap, Bulma, JQuery.

Projects

HomeHub: Full stack application that provides the landlords/tenants with a complete solution to manage properties details, maintenance tickets, and communication.

- GitHub Repo: [HomeHub\(github.com\)](https://github.com) | Deployed Site: [NightOwl \(github.io\)](https://github.io)
- Technologies: HTML, CSS, Bootstrap, Javascript.
- My role: Researching client-side APIs, JS coding, contributed to CSS styling.

NightOwl: Web application that provides the user with the upcoming events in their city, as well as nearby restaurant recommendations.

- GitHub Repo: [NightOwl \(github.com\)](https://github.com) | Deployed Site: [Home-Hub \(heroku\)](https://heroku.com)
- Technologies: NodeJS, Express, Sequelize, Bcrypt, Express-Handlebars, Express-Session, Bulma.
- My role: Back-end and Front-End logic. Set up routes, handlebars, and models.
